The following information summarizes our progress towards meeting our deforestation-free target in soy supply chain by 2023:

<p>Traceability to country of origin of paper and board</p>	<p>In 2021, 97% of our directly purchased paper and board packaging materials were made from recycled fiber or came from certified sustainably managed forests. In total we sourced in 65 countries. The countries listed below account for >90% of the total annual purchased volume listed in descending order: Indonesia, India, United States, Brazil, China, Thailand, Germany, Vietnam, United Kingdom, Mexico, Poland, South Africa, Egypt, Turkey, Italy, Argentina, Russian Federation, France, Hungary, Philippines, Pakistan.</p>
<p>Paper and Board originated in high risk or unknown origins</p>	<p>48.8% of the paper and board sourced in 2021 originates from high-risk countries of which 95.6% are made from recycled fiber or are FSC/PEFC certified with full chain of custody. By 2023 we expect to convert the remaining volumes to be certified deforestation and conversion free.</p>
<p>Progress on ensuring paper and board is conversion-free for high-risk origin</p>	<p>We are actively engaging with our suppliers to develop bespoke solutions for deforestation and conversion-free paper and board in the remaining part of our supply chain aiming to work with their suppliers to increase traceability in the supply chain and achieve a fully certified deforestation free value chain.</p>
