¹ The total volume of Soybean Oil sourced in CY 2020 was 333K MT (data source UL Sustainable Sourcing System). This list contains direct suppliers accounting for in excess of 99.9% of Unilever's Soybean Oil purchases in CY 2020.

SOY ORIGINS FOR CY 2020²

The following information summarizes our progress towards meeting our deforestation-free target in soy supply chain by 2023:

Traceability to country of origin of soybean	<p>96% of the soybean oil sourced in CY 2020 is traceable back to country of origin of the soybean.</p> <p>Countries of origin are: USA, Canada, Brazil, Ukraine, China, Bolivia, Argentina, Serbia, Romania, Croatia, Germany, Austria, Hungary, Greece, Czech Republic, France.</p>
Soybean originated in high risk or unknown origins	<p>22% of the soybean oil sourced by exit 2020³ was originated in high-risk or unknown origins.</p> <p>Main high-risk origin was Brazil, followed by Argentina and Bolivia.</p>
Progress on ensuring soy is conversion-free for high-risk origins	<p>56% of soy originated in high-risk origins by exit 2020 was conversion-free via ProTerra certified segregated sourcing⁴.</p> <p>We are actively engaging with our suppliers to develop bespoke solutions for deforestation and conversion-free soy in the remaining part of our SC.</p>

² The disclosed information is based on UL internal reporting systems and a third-party traceability assessment conducted by Proforest on our soybean oil suppliers for CY 2020.

³ Exit 2020 refers to Q4 2020 sourcing data.

⁴ 100% of our global soybean oil footprint is covered by a combination of third-party certifications, own impact programs and RTRS certificates from our own program in Southern Cerrado.
